Dear Dog Owner/Lover:

Congratulations on the purchase of your Pet Patio Potty™ made by Doggy Solutions™. We sincerely hope that this product gives both you and your pet the added freedom helpful in today's busy life. Never hesitate to contact us with any questions regarding the use and maintenance of this device or about training your puppy or dog to use its' Pet Patio Potty™.

Included with your shipment are the following items:

- **Pet Patio Potty™ Polyethylene Box Frame.**
- **Plexiglas Side Panels, Front Brace, and Canopy Brace** (the small size unit also includes a **Back Side Brace**).
- **Screws** required for assembly
- **Polyethylene Tray(s) fitted with Perforated Polyethylene Barrier**
- **Tray Handles and Handle Screws**
- **Sunbrella canvas cover:** This water and fade resistant cover conveniently snaps onto your unit and can be readily removed for laundering.
- **Out! PetCare Training Aid for Puppies:** This product can help train your pet to urinate in the potty. Simply spray a small amount of the training spray on the K9Grass. Reapply as necessary until your dog has been trained to use the potty.
- **Synthetic Grass:** A piece of Synthetic K9Grass is included for insertion in each tray of your potty. Please consult the Maintenance Instructions for the procedure you can follow to clean these sod pieces. This K9Grass is quite durable and should last indefinitely if cleaned properly. However, if at any time you wish to purchase replacement pieces of K9Grass, please contact Doggy Solutions™.
- **Litter Scoop** for removing soiled litter.
- **Assembly and Set-Up Instructions** with photos
- **“How The Pet Patio Potty™ Works”** Photo Tutorial
- **Maintenance Instructions**
- **Training Instructions**

We sincerely appreciate your business and hope you will share your Pet Patio Potty™ experience with us via stories, feedback, questions, comments and photos.

Also, you can “like” us on Facebook @ <http://www.facebook.com/doggysolutions> and you can tell us your stories and share your photos on our Wall!!

Pet Patio Potty™ by Doggy Solutions™

**Assembly and Set-Up Instructions: Small Indoor Male Model**

Assembly

1. Place the box frame with the “Front” of the box facing you. All “Side Panel Screws” and “Base Screws” required to assemble your Small Indoor Male Model Pet Patio Potty™ are provided.

2. Please note that the labels on the side panels are placed on the side of the panel that should face the inside of the box.
3. Position the panel labeled “Left Side” on the left side of the box frame so that the inside piece of Polyethylene slides inside the box and the outside piece of Polyethylene slides outside the box.

4. Position the “Back Side” panel in a similar fashion on the back side of the box frame.

5. Take two of the “Side Panel Screws” and with a Phillips Head screw driver, screw the back pole of the “Left Side” panel to the left pole of the “Back Side” panel. The panels and poles are pre-drilled, therefore, use the holes provided when screwing the panels together.

6. Position the “Right Side” panel on the right side of the box frame.

7. Using the remaining “Side Panel Screws”, screw the back pole of the “Right Side” panel to the right pole of the “Back Side” panel.

- Using the “Base Screws” provided, attach the bottom of each of the Polyethylene panels to the box frame using the pre-drilled holes. There are two screws for each panel.

## Set Up

- The Indoor Male Model of the Pet Patio Potty™ is designed for indoor or lightly protected outdoor use because it does not have a canvas cover. If you plan to place the potty on a covered balcony or porch, please be sure to place it in a location that will not be exposed to ANY environmental moisture. Indoors, it is suggested that the potty be placed on a hard surface (that is, on a floor rather than carpeting). Polyethylene “feet” have been attached to the bottom of the potty frame to assure that the bottom of the potty is not allowed to rest on a moist surface and to facilitate cleaning around the potty.
- Purchase a litter product of your choice. A clumping style kitty litter is recommended because it makes clean up easier. Also, a litter that has odor control properties can be very beneficial, particularly for those potties set up indoors. We recommend Tidy Cats Scoop for Multiple Cats with odor control or Dr Elsey’s Precious Cat Ultra. With the trays removed from the frame, distribute a generous layer of litter over the entire bottom surface of the box. However, do not overfill - the litter should not be in contact with the bottom surface of the trays.
- Attach two handles to each tray by inserting the “Handle Screws” into the pre-drilled screw holes in the trays.
- If you have decided to use gravel as the substrate in the trays: Obtain pea gravel (or 1/2” river rock) from your local garden supply center or home supply store such as Home Depot. Each standard size tray (these are the size trays in your small size model when two trays are provided) requires approximately 0.16 cubic feet of pea gravel and each double-sized tray requires about 0.32 cubic feet of gravel. A common size bag of gravel that is available at most garden centers contains 0.5 cubic feet of gravel. This is enough gravel for your small size unit with some to spare.

5. With the handles facing upward, insert the trays in the box frame.

6. Evenly distribute the gravel over the polyethylene barrier in each tray to a depth of about ¾”.

7. If you have purchased synthetic K9 Grass to be used as the substrate in the trays: Insert one piece of synthetic grass into each tray of the Pet Patio Potty™.
